Portfolio: mrluisfer.vercel.app

Professional Summary

Full-Stack Software Engineer with 5+ years of experience designing and shipping scalable, accessible, and high-performance web applications across fintech, logistics, and consulting domains. Led backend API migrations to NestJS and Prisma that reduced response times by 40%, architected a 50+ component design system adopted by 5+ product teams, and integrated critical third-party services serving 10K+ monthly users. Strong focus on TypeScript type-safe development, observability, performance optimization, and cross-functional collaboration with product, design, and data teams to deliver measurable business impact.

Professional Experience

- **CredixGS** *On-Site / Morelia, Michoacán*
Full-Stack Software Engineer *Sep 2025 – Present*
 - **Core Platform Engineering:** Design and ship full-stack features (frontend, backend, database) for the core platform of a financial services firm with 15+ years in the Mexican market, ensuring reliability and compliance for mission-critical operations.
 - **Database Performance & Reliability:** Optimized MySQL and MariaDB schemas, indexes, and stored procedures, reducing latency on critical queries by 35% and improving platform stability under production load supporting thousands of daily financial operations.
 - **Legacy Modernization:** Refactor and incrementally modernize legacy PHP codebases, balancing backward compatibility with the introduction of modern patterns, type safety, and improved maintainability.
 - **Government & Financial API Integrations:** Integrated 3 critical Mexican APIs (IMSS, INE, Buró de Crédito) for automated KYC, compliance verification, and customer due diligence, cutting manual onboarding time by 50% with resilient error handling for unstable third-party endpoints.
 - **Cross-Functional Collaboration:** Partner with finance, commercial, legal, and UI/UX teams to translate regulatory and business requirements into technical specifications and production-ready solutions.
- **Nowports** *Remote / Mexico City*
Senior Full-Stack Software Engineer *Mar 2023 – Dec 2024*
 - **Component Platform & Design System:** Architected a unified design system with 50+ accessible, reusable components using React, TypeScript, Remix-UI, and React Aria (Adobe), adopted by 5+ product teams and reducing average feature delivery time by 30% while enforcing WCAG 2.1 AA standards through documentation, theming, and strict type contracts.
 - **AI-Powered Conversational Interface:** Co-designed and shipped a chatbot interface in collaboration with the Data team, enabling users to query shipment history, resolve inquiries, and surface behavioral insights to inform product decisions.
 - **Backend API Migration & Performance:** Led migration of legacy backend services to NestJS, Prisma, and TypeScript, reducing API response times by 40% and cutting onboarding time for new engineers by 25% through redesigned data fetching strategies and consistent architectural patterns.
 - **Cloud Infrastructure & DevOps:** Managed Azure-based repositories, pull request workflows, and CI/CD pipelines (1.5 years), ensuring reliable deployments and standardized contribution flows across multiple engineering teams.
 - **Observability & Quality Engineering:** Integrated Sentry for real-time error tracking and performance profiling, reducing mean time to detection (MTTD) for production incidents by 60%, and established code review standards plus architectural guidance to sustain long-term codebase health.
- **Nowports** *Remote / Mexico City*
Senior Frontend Engineer *Aug 2022 – Mar 2023*
 - **Analytics & Behavioral Tracking:** Implemented cookie management, GA4, and GTM integrations enabling cross-regional user behavior tracking and data-driven product decisions, partnering directly with marketing and growth teams.
 - **Headless CMS & SSR Performance:** Built Next.js integrations with HubSpot CMS for automated content delivery, leveraging server-side rendering and image optimization to improve Core Web Vitals (LCP -35%, CLS -50%) and lift Lighthouse performance scores to 90+ on marketing surfaces.

- **Cross-Functional Delivery:** Coordinated execution between product, design, and marketing under agile methodologies, translating business requirements into deliverable technical specifications.

- **Accenture**

Remote / Mexico City

- *Frontend Developer*

Aug 2021 – Jul 2022

- **UI Engineering & Accessibility:** Refactored 20+ components across landing pages and product surfaces for Fortune 500 enterprise clients reaching 100K+ end users, improving maintainability through design token adoption and WCAG-compliant accessibility enhancements.
- **Agile Delivery:** Shipped features across 10+ bi-weekly sprint cycles for enterprise clients, maintaining 95%+ on-time delivery while collaborating across distributed cross-functional teams.

Selected Side Projects

- **Monfly** – Subscription tracking app built with Next.js, better-auth, NeonDB, and TailwindCSS. Type-safe full-stack architecture with serverless Postgres.
- **Cusana** – Personal finance and expense tracker with modern React patterns, server actions, and optimistic UI updates.
- **Impostor Game** – Real-time multiplayer word game in React and TypeScript, designed for Spanish-speaking adult audiences.
- **Linktry** – Open-source Linktree alternative emphasizing customization, performance, and clean DX.
- **Personal Portfolio** – Bento-style portfolio built with Astro, focused on performance budgets, zero-JS by default, and partial hydration.

Education

- **Instituto Tecnológico de Morelia (Tecnológico Nacional de México)**

Morelia, Michoacán, Mexico

- *B.S. in Computer Systems Engineering*

In Progress – Expected 2027

Certifications

- **Advanced TypeScript: Types and Functions** – Platzi (2023)
- **Scrum Foundation Professional Certificate** – CertiProf (2022)
- **Professional React Course** – CódigoFacilito (2021)
- **JavaScript Certifications** – HackerRank & Cisco Netacad (2020)

Languages

- **Spanish** (Native) • **English** (C1 Advanced)

Technical Skills

- **Languages:** TypeScript, JavaScript (ES6+), PHP (5.6 / 8.3), SQL, HTML5, CSS3
- **Frontend:** React.js, Next.js, Astro, TailwindCSS (v4), shaden/ui, Remix-UI, React Aria, Framer Motion, CVA, TanStack Query, Zustand
- **Backend:** Node.js, NestJS, Express.js, Prisma, REST APIs, Zod, Axios
- **Databases:** PostgreSQL, MySQL, MariaDB, NeonDB, MongoDB
- **Cloud & DevOps:** Azure (Repos, Pipelines, CI/CD), Vercel, Netlify, Docker, GitHub Actions
- **Testing & Observability:** Jest, Cypress, Sentry, Performance Profiling, Core Web Vitals
- **Analytics & Integrations:** Google Analytics 4, Google Tag Manager, HubSpot CMS, better-auth
- **Practices:** Design Systems, Accessibility (WCAG), Type-Safe Architectures, Code Reviews, Agile/Scrum, Cross-Functional Collaboration
